

## Disc type yarn end finder station

---

### Description:

Disc type yarn end finder station in place of belt type yarn end finder for Direct Link System machines.

**Machine :** Automatic Winding Machine Model Polar I-DLS

**Validity :** All machines with belt type yarn end finder

**Kit type :**

- Left Hand Machine - First yarn end finder
- Left Hand Machine - Second yarn end finder
- Right Hand Machine - First yarn end finder
- Right Hand Machine - Second yarn end finder

### Features and benefits:

- Bobbin movement by rotation of disc instead of belts.
- Yarn end finding and end insertion, at two separate points.
- Higher efficiency and capacity up to 1440 Bobbins / hour.
- Adds cushion to doff run time and flexibility in day to day operations.
- Less fluff accumulation and less maintenance.
- Easy to retrofit.
