

TFO Spindle reconditioning

TFO Spindle reconditioning

Description:

Aging machines, demand incremental maintenance & have unpredictable breakdowns which leads to drop in performance. Spindle Reconditioning facilities at Savio, provides almost original performance in cost effective way, thus get optimal performance.

Item: TFO Spindles

Validity: All TFO Spindles supplied for Model SIRIUS and COSMOS

Reconditioning scope:

- It involves reconditioning of Spindle (As shown in Picture), which is heart of the TFO Machines.
- Replacing old bearings and wharve pulley with new, cleaning.
- Lubricating , Checking run-out, balancing the spindles and testing for vibration. Reconditioning

Benefits:

- Economic solution for uplifting the performance of aged machines.
- Savio certified reconditioned spindles for almost original performance
- Enhancing the residual life of the machines.

Note: While reconditioning, spindles would be rejected if beyond allowed technical tolerance and not confirming to the savio tests.
